

# Rockfon is the clear favourite for Paddy Power

## Demanding specification

Paddy Power has enjoyed strong growth during the last twelve months. They've opened a further 55 outlets in the UK alone. The bookmaker prides itself on investing in its shop design. Rockfon worked closely with Paddy Power to help create an environment where customers can enjoy the best possible experience.

Rockfon Color-all ceilings in Charcoal were fitted in all 55 shops. Paddy Power Surveyor Stuart Henderson explains the reasons for choosing Rockfon, *"The colour and texture of the ceiling enhance our new oak wall and floor designs. Rockfon has been very attentive to our needs, they're competitive and ensured stock was available nationwide."*

With any interior design, the ceilings must complement the design concept. Color-all is available in 34 colours, giving architects and specifiers the opportunity to create inspirational interiors.

## Products in use

- Rockfon Color-all® tiles
- Chicago Metallic™ matching coloured grid

Color-all can be fitted as ceiling panels or wall panels in a number of sizes with a choice of exposed, semi-concealed or concealed edges. Wall panels are ideal for when it is not practical to install a traditional suspended ceiling – offering architects even greater design freedom.

Alan Daubney, AD Contractors, installs the Color-all ceilings in the new Paddy Power outlets and enjoys working with Rockfon *"I have worked with Rockfon before and know their product range. Their ceilings are really easy to handle and install. The finished results always look great."*

Color-all products have a superior smooth, matt surface finish, creating an attractive contemporary ceiling. The Charcoal surface colour specified for Paddy Power provides an additional benefit – the dark colour does not reflect light onto the TV and multimedia screens, eliminating glare.

Retail leisure environments are known to be bustling places with people constantly moving in and out. Rockfon Color-all provides the highest Class A sound absorption to help control the sound, preventing the build-up of noise levels.

As with all public spaces, fire safety is important. The complete range achieves the highest safety rating, Class A1. To provide architects with even greater design freedom, Rockfon recently launched Rockfon Color-all® Special – a bespoke colour service for tiles and grids.
